HELP

### Welcome to Transposition and Withdrawal application

The NSO shall undertake to transpose European Standards (ENs) and European Standardisation deliverables (as appropriate) in accordance with clause 2.4 of the TWP.

#### Transpose

Allows Official and Voting contacts for NSO countries to update the transposition data of the country they represent.

#### Transpose via File

Allows Official and Voting contacts for NSO countries to update the transposition data of the country they represent using a file.

#### Query

Search and view facility which allows you to view all transposition data. You can select for which documents and countries the transposition data should be displayed.

#### Report Performance

Generates a dynamic report containing the number of documents transposed by each NSO country.

#### Report Comments

Shows all the comments given regarding the transposition of a document.

### Transposition period

	Action	Default period
doa	Latest date of national announcement of the European standard or European standardisation deliverable	Three (3) months after the publication by ETSI of the European Standard or European standardisation deliverable
Dop/e	Latest date of publication or endorsement as a national standard	Six (6) months after doa
dow	Latest date of withdrawal of conflicting national standard(s)	Six (6) months after doa (i.e. normally same as dop/e but if later, the European Standard or European standardisation deliverable is valid alongside the conflicting national standard(s))

### After transposition

According to article 13.7 of the ETSI Rules of Procedures :

Transpose

Transpose via File

Query

Report Performance

Report Comments

# Report performance

The report performance provides a quick assessment of the number of standards transposed by the NSOs. The report includes the following information:

- Country
- Date when the 1st Memorandum of Understanding (MoU) was signed between ETSI and the organisation
- Organization name
- N° of standards transposed
- Percentage of standards transposed
- Indicator

**Harmonised**

- ☐ Yes
- ☐ No
- ☒ All

**Period**

From year 2023

To year 2024

Only the standards published since the organisation became an NSO are taken into account.  
Example: OVE became NSO in September 2003

SEARCH

You can choose whether to include only Harmonised standards and filter by a specific time period. A report will be generated based on the selected filters.

# Query

---

It allows users to specify search criteria to find and retrieve relevant documents or standards, such as those that have been transposed or not, within a specific country, time frame, or technical body.

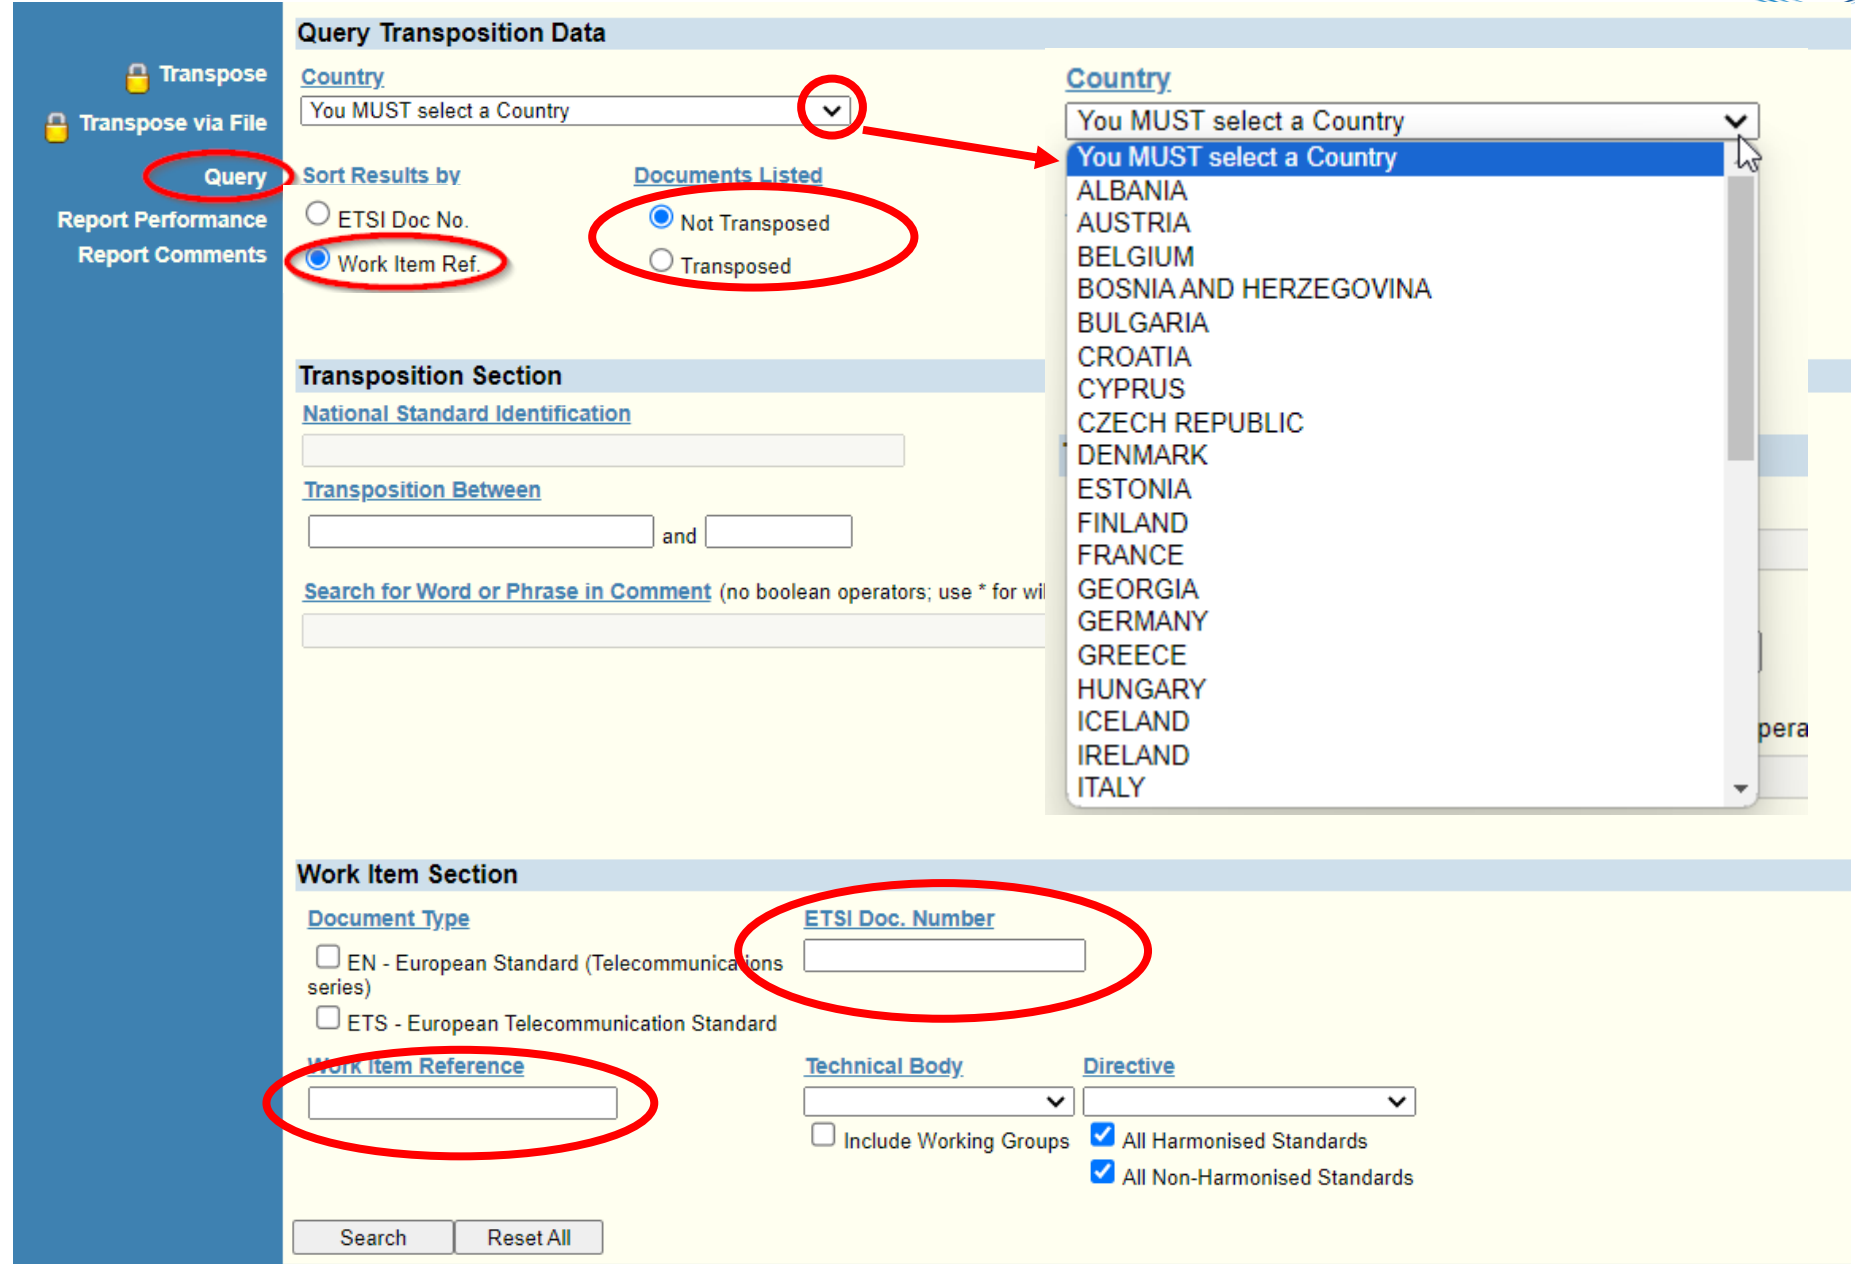

# Query

1. First you must select a country for this search.

Then select if you are looking for transposed standards or non-transposed standards. If you are looking for a specific document, and you have the Work item reference, select Work Item Ref. instead of ETSI Doc No. otherwise, leave the selection as it is and type the document number.

**Query Transposition Data**

**Country**  
You MUST select a Country

☒ All Non-Harmonised Standards

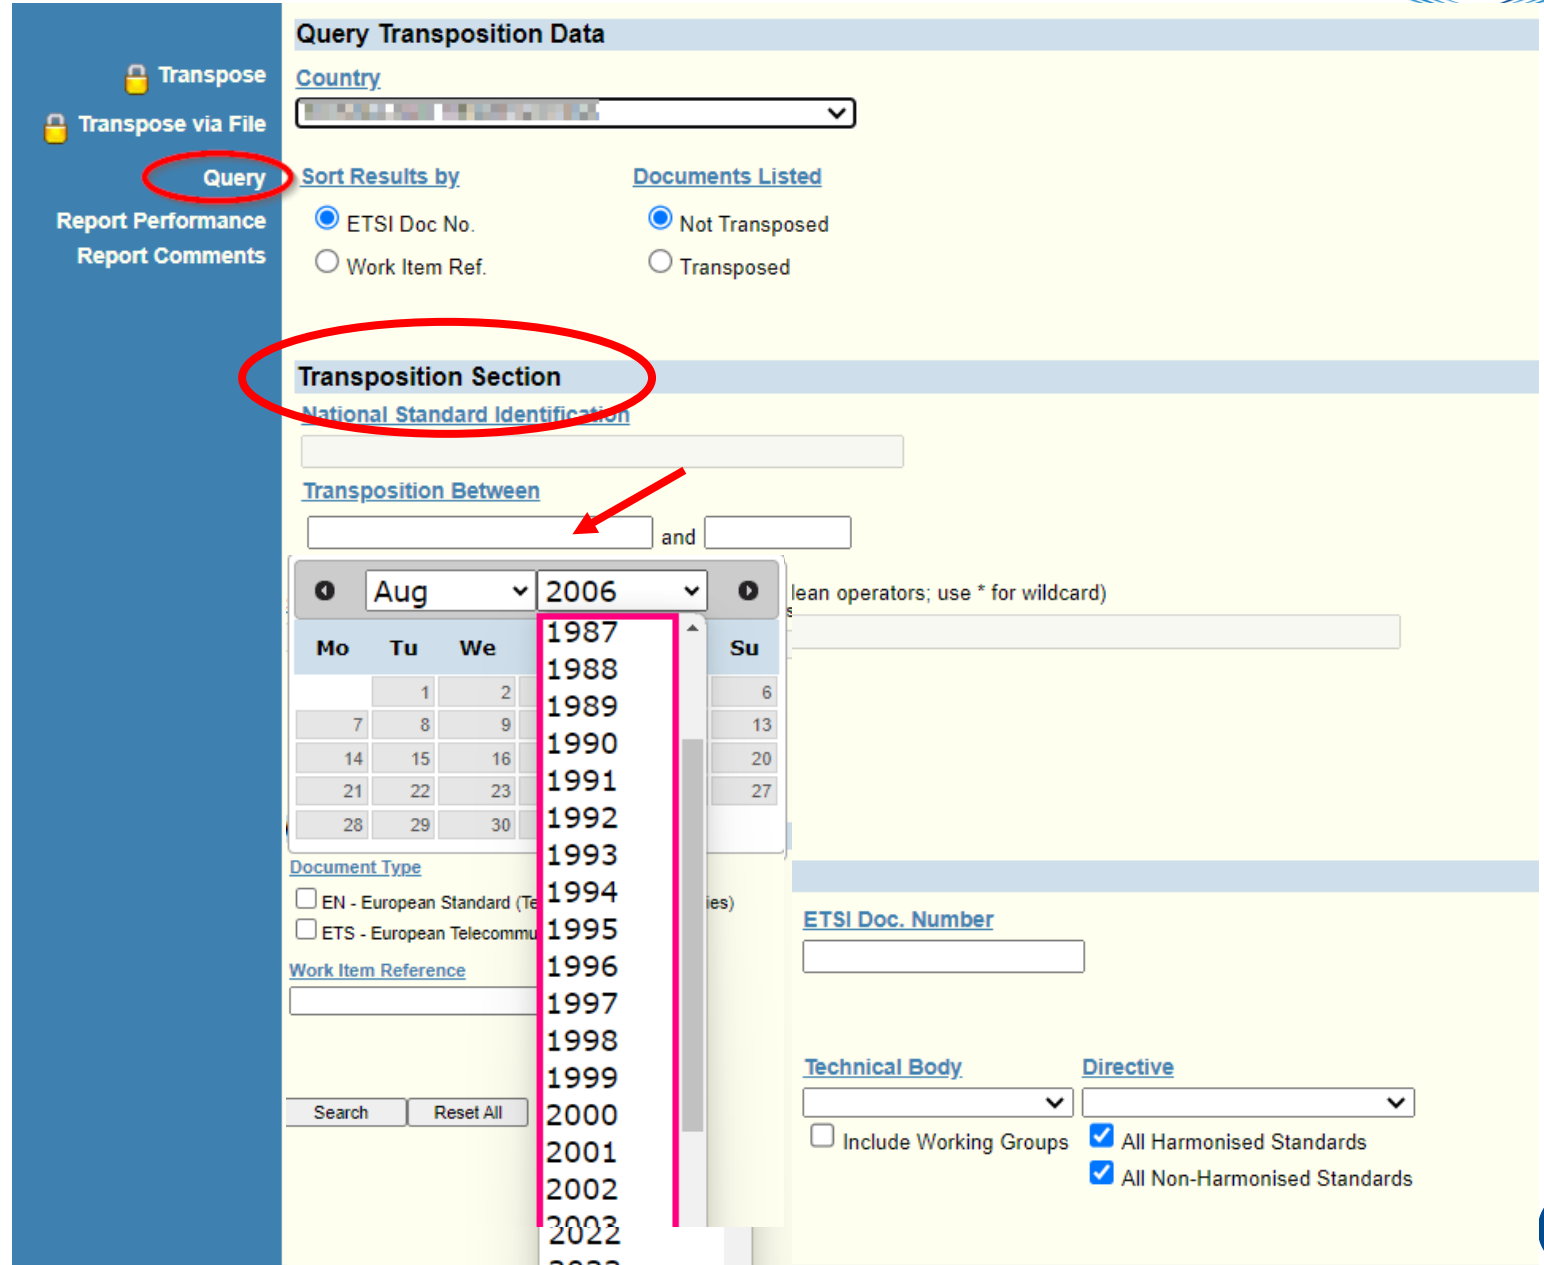

Search Reset All

# Query

When the country and the criteria are chosen, go to the **Transposition Section criteria**:

This is optional. If you need to define a period, there is a trick to get the oldest date.

1. Click in the empty box below “transposition between”.
2. A calendar will automatically be displayed.
3. To define the period, it is important to note that it is sometimes necessary to do it in two steps.
4. If the year you are looking for is not displayed because it is too old;
5. select the oldest one and
6. re-click again on the arrow in the year field
7. then the month and click on a specific day.

# Query

In the « Work item section » you have the choice to search for a specific document or work item reference.

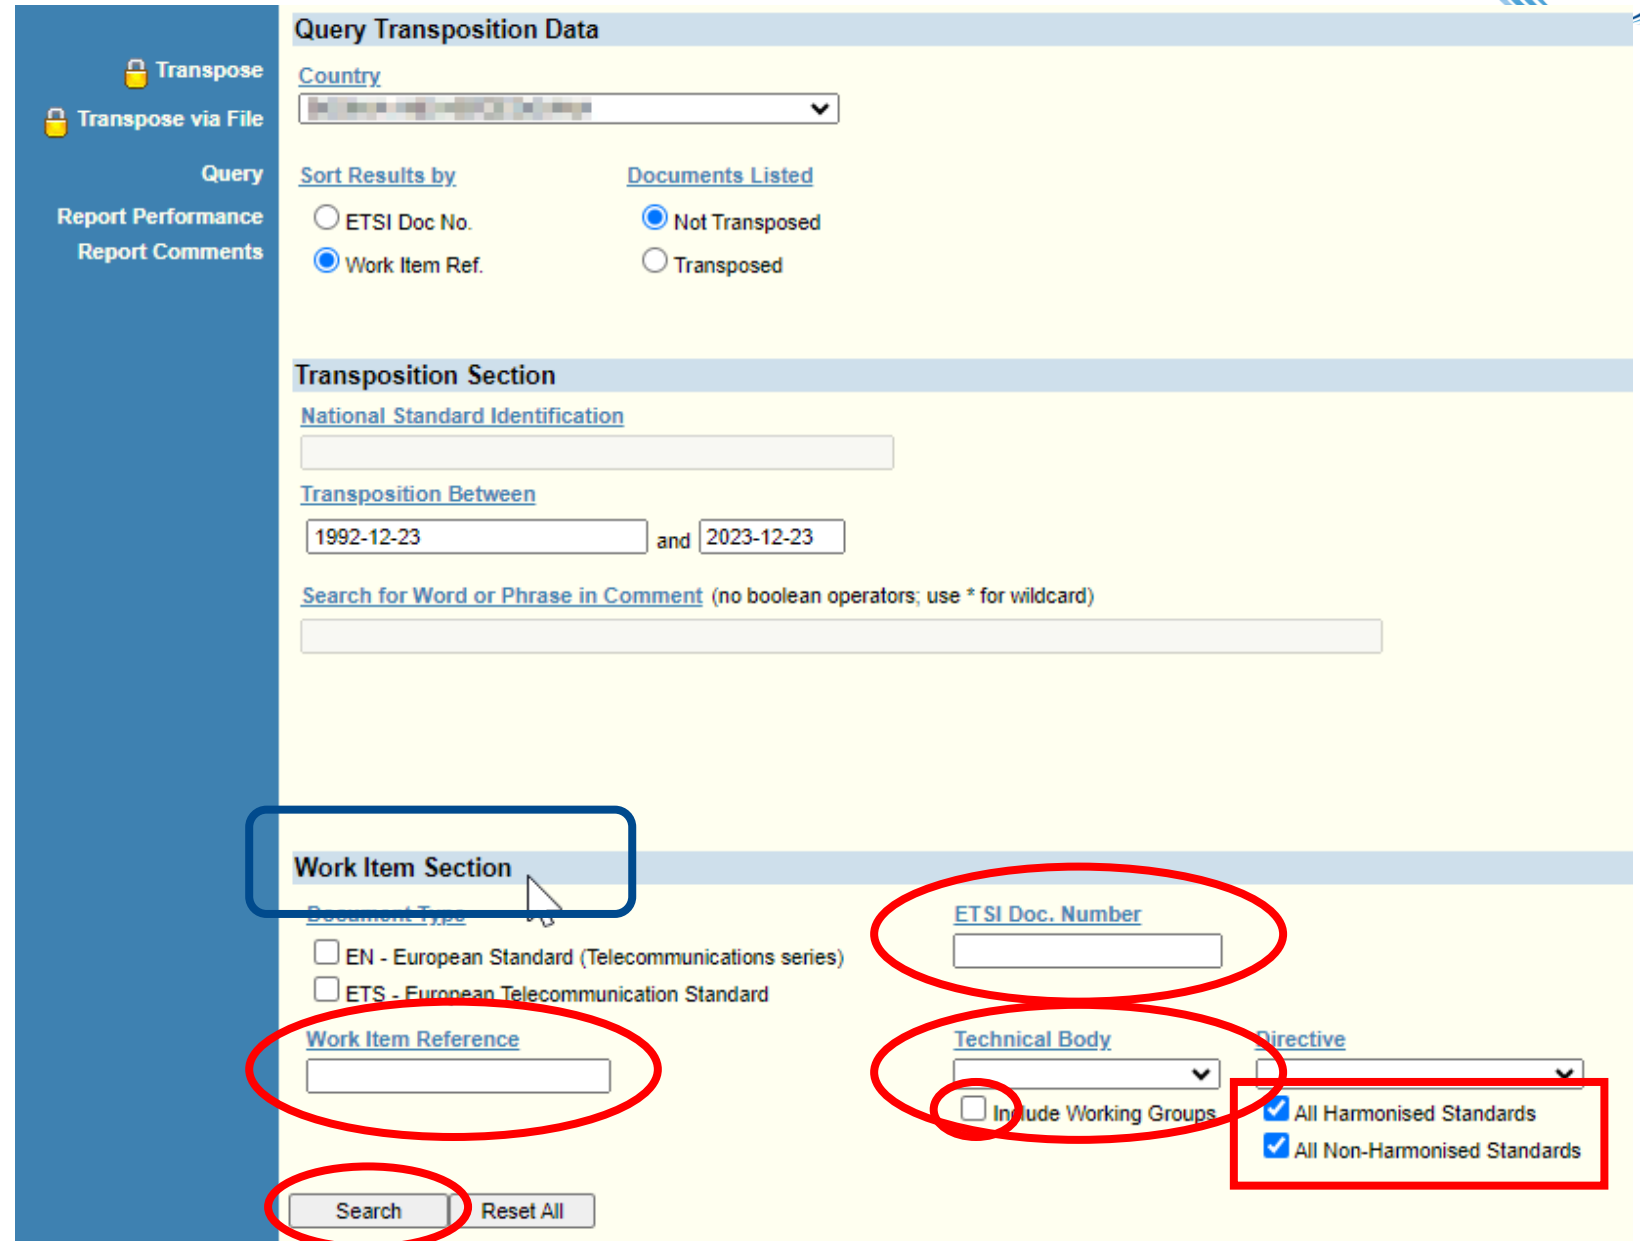

It is also possible to search for ENs only, or ETSs only. If nothing is ticked, it will give all results.

If you are interested in a specific Technical Body you can also search for them. Don't forget to tick « Include Working Groups' if you are not sure.

And finally, you can search for Harmonised standards only, non-harmonised only or both.

You will notice that « TBR » is not mentioned. But they will be provided in the results.

When all your criteria are entered, click on « Search »

The screenshot shows the ETSI Query Transposition Data interface. The left sidebar contains navigation links: Transpose, Transpose via File, Query, Report Performance, and Report Comments. The main content area is divided into sections: Query Transposition Data, Transposition Section, and Work Item Section. The Work Item Section is highlighted with a blue box. Within the Work Item Section, the Document Type section has checkboxes for EN - European Standard (Telecommunications series) and ETS - European Telecommunication Standard. The Work Item Reference section has a text input field. The ETSI Doc. Number section has a text input field. The Technical Body section has a dropdown menu and a checkbox for Include Working Groups. The Directive section has a dropdown menu and two checkboxes: All Harmonised Standards and All Non-Harmonised Standards. The Search and Reset All buttons are at the bottom. Red circles and rectangles highlight the Work Item Section, Document Type, Work Item Reference, ETSI Doc. Number, Technical Body, Include Working Groups, and the Directive checkboxes.
